# Get Started

Quicken Simplifi helps you see all of your money in one place – what you earn, what you spend, and what you can save.

This guide will walk you through the basic setup steps so you can get started quickly. You don't need to set everything up all at once. In just a few minutes, you'll connect your accounts, set up a simple budget, and create savings goals.

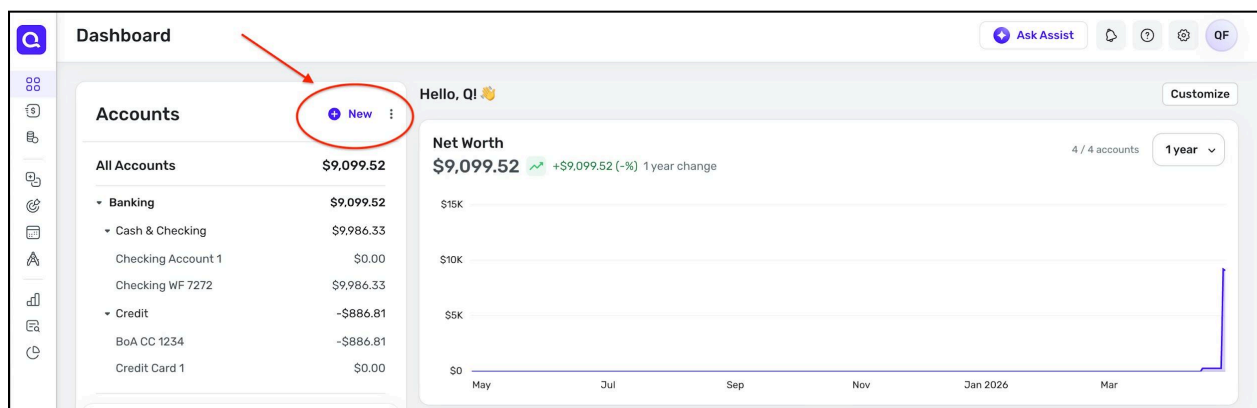

Once your accounts are connected, Simplifi will automatically update your spending and balances as new transactions come in.

## Add Your Accounts

To get started in Quicken Simplifi, you first need to connect your financial accounts. This allows Simplifi to import your transactions and balances automatically.

### Connect a Bank Account

1. From the dashboard, click **+ New** in the upper-right corner of the **Accounts** area.

2. In the search bar, type the name of your bank.
3. Select your bank from the list of results.
4. Review the consent message and click **Continue**.
5. Enter the username and password you use to log in to your bank's website, then click **Connect**.
6. Simplifi will find your accounts and display them.
7. Check the accounts you want to add, then click **Add**.

Once added, your accounts will appear in your **Accounts** list and start syncing automatically.

### Add a Manual Account (Optional)

If your bank is not supported, you can add an account manually.

1. Click **+ New** in the **Accounts** area.
2. Select **Add Manual Account**.
3. Choose the account type (such as checking, savings, or credit card).
4. Enter the account name and any starting balance details.
5. Click **Continue**.

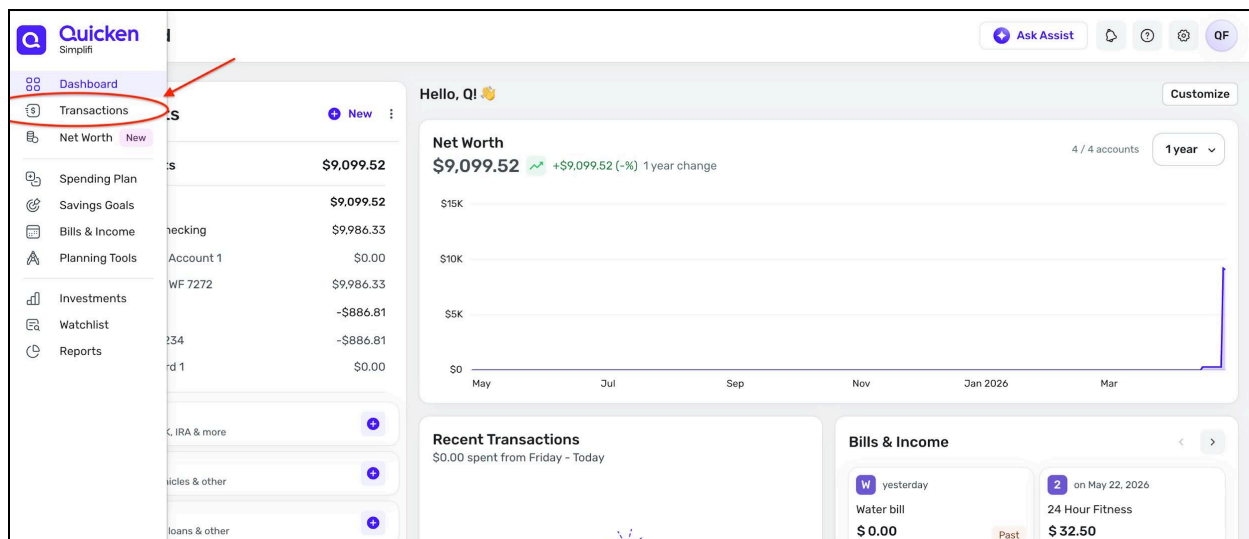

Your manual account will now appear in your **Accounts** list. You can update it at any time by adding transactions manually.

**Note:** Quicken Simplifi uses secure connections to sync with your financial institutions. For more information on how your data is protected, visit the online [Help Center](#).

## Manage Transactions

You can view all activity from your connected accounts in the **Transactions** section. This is where Simplifi shows your spending, income, and transfers in one list.

1. From the left menu, select **Transactions**.

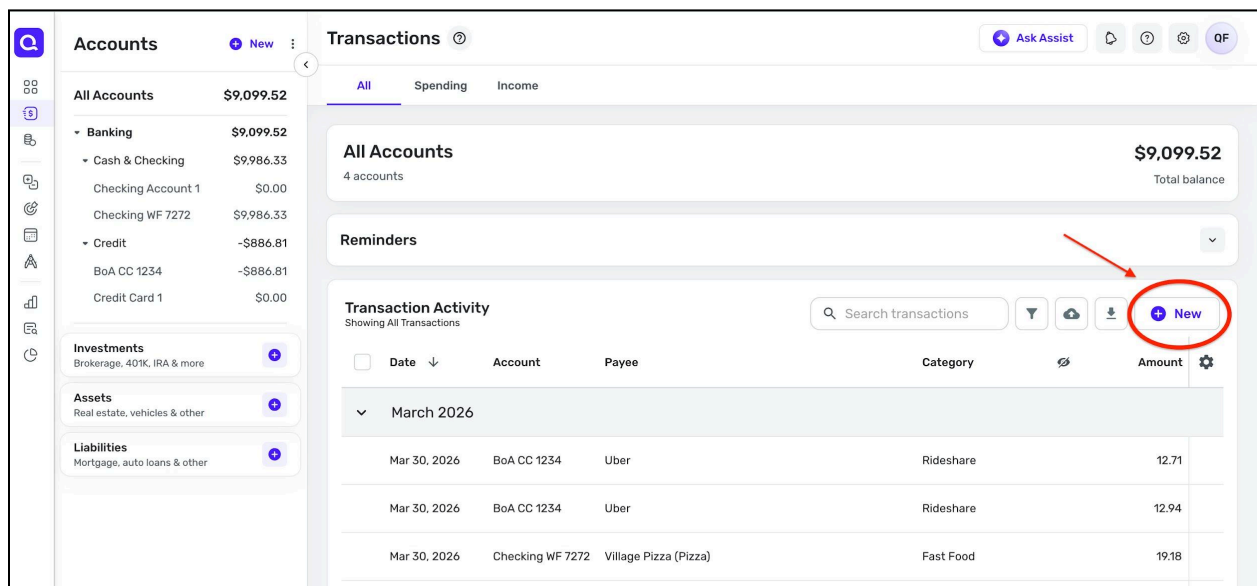

2. You'll see a list of all recent transactions across your accounts.
3. Each transaction includes the date, account, payee, category, and amount.
4. To edit any of these details, click the **three-dot menu** next to any transaction and select **Edit Transaction**.

## Add Transactions

You can manually add a transaction when something is missing or you want to record an expense before it appears in your account.

1. In the **Transaction Activity** pane, click **+ New** in the upper-right corner.

2. Enter the transaction details:
  - Payee
  - Amount
  - Date
  - Category
3. Select the account the transaction belongs to.
4. Click **Create**.

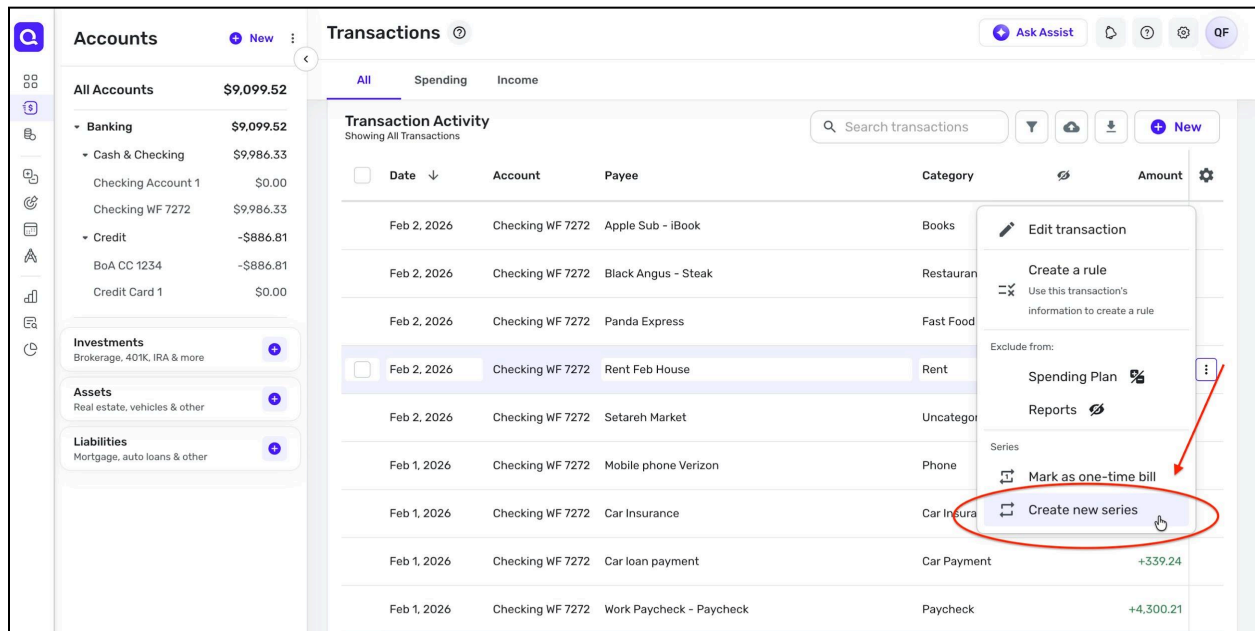

The transaction will now appear in your **Transactions** list.

## Create a Recurring Transaction

Simplifi typically recognizes and categorizes recurring transactions on its own, but from time to time, it misses something.

You can create or manage recurring transactions directly from the **Transactions** view when you see a transaction that repeats (such as rent, subscriptions, or income).

1. Find the transaction you want to make recurring.
2. Hover over the transaction and click the **three-dot menu** on the right.
3. Select **Create new series**.

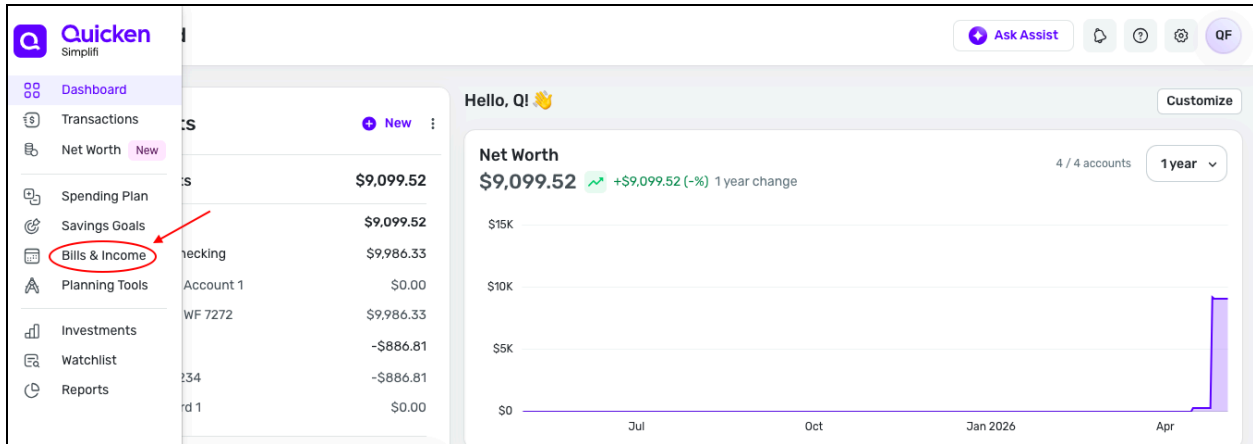

4. Review the details (payee, amount, date, category) and adjust if needed.
5. Click **Create**.

These series will now be listed as upcoming transaction reminders in the **Bills & Income** section.

## View Your Bills & Income

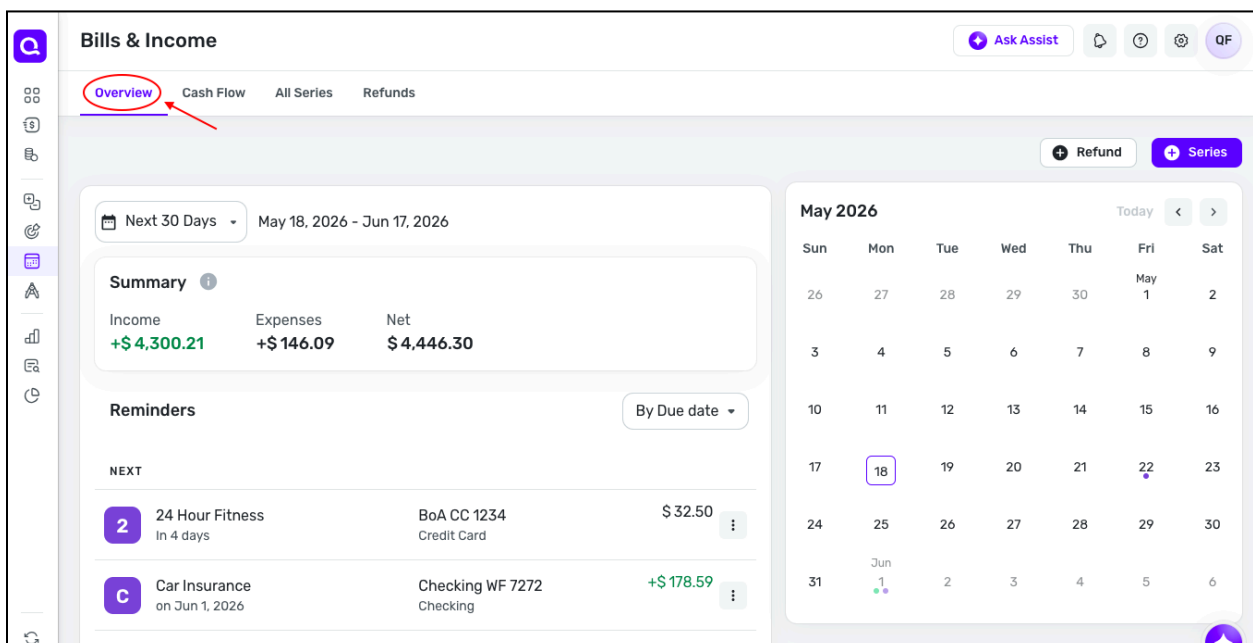

The **Bills & Income** section in Quicken Simplifi shows your upcoming bills, income, and recurring transactions, giving you a forward-looking view of your expected cash flow.

To access it, click **Bills & Income** in the left menu.

## Overview Tab

The **Overview** tab is the default landing page of the **Bills & Income** section.

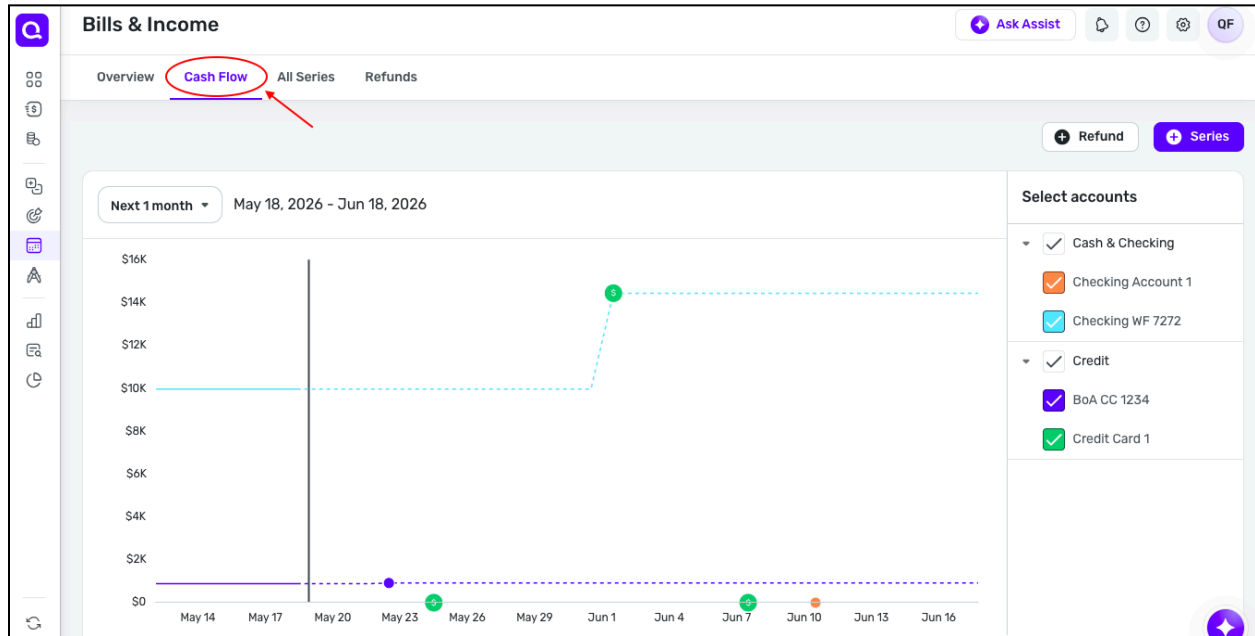

It gives you a snapshot of your upcoming financial activity:

- **Summary** – Your net cash flow for the selected time period
- **Reminders** – Scheduled bills and income
- **All Past Due** – A list of all overdue items
- **Calendar** – Visual overview of upcoming due dates

Use this section to quickly understand what money is coming in and going out.

## Cash Flow Tab

The **Cash Flow** tab shows in line graph form how your balance is expected to change over time based on upcoming bills and income.

Here you can:

- View projected account balances over time.
- See how scheduled transactions affect your cash flow.
- Hover over points on the graph to view details for specific dates.

## All Series Tab

The **All Series** tab lists all recurring transactions in one place.

The screenshot shows the 'Bills & Income' section with the 'All Series' tab selected. The table lists all recurring transactions, categorized by 'All Active', 'Bills', 'Subscriptions', 'Income', 'Transfers', and 'Canceled'. The table has columns for the transaction name, the account used, the bill type, the frequency, and the amount.

|   | All Active                      | Bills       | Subscriptions | Income      | Transfers | Canceled |
|---|---------------------------------|-------------|---------------|-------------|-----------|----------|
| 2 | 24 Hour Fitness                 | BoA CC 1234 | Fitness Bill  | \$32.50     | \$292.50  |          |
|   | Next: \$32.50 on May 22, 2026   | Credit Card |               | Every month | Yearly    |          |
| B | Buying Clothes (Monthly Budget) | BoA CC 1234 | Clothing Bill | \$100.00    | \$700.00  |          |
|   | Next: \$100.00 on Jun 20, 2026  | Credit Card |               | Every month | Yearly    |          |

Here you can:

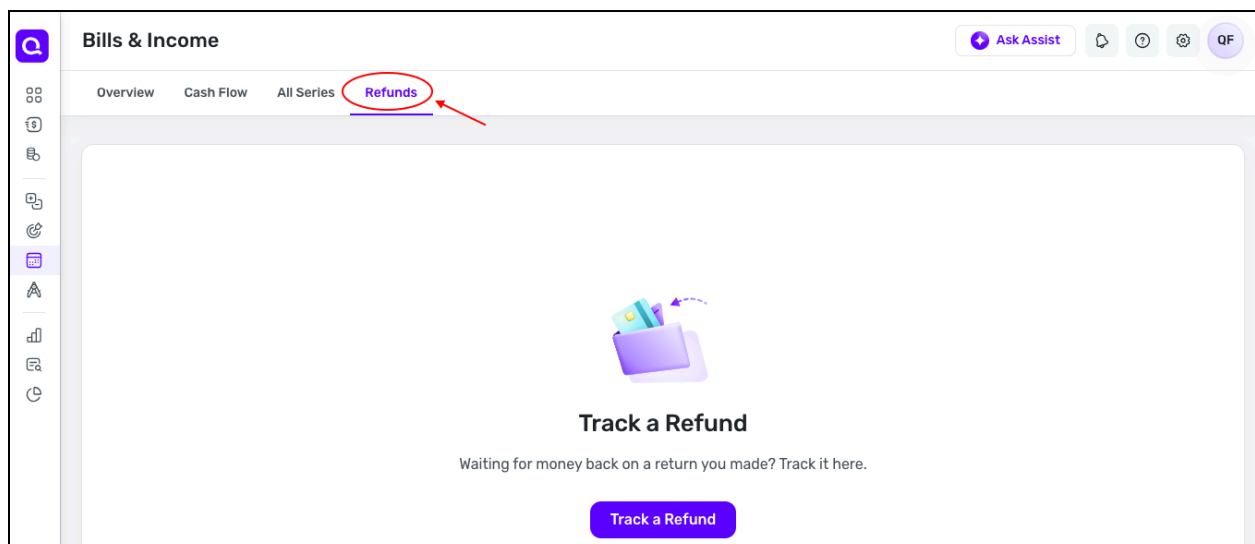

- View all recurring bills and income.
- Open any item to see details.
- Edit or manage recurring series as needed by hovering over a list item and clicking the **three-dot menu**.

**Note:** A new recurring transaction can be added to the reminder list at any time from any tab in the **Bills & Income** section by clicking the **+Series** button in the top right corner.

## Refunds Tab

The **Refunds** tab helps you track expected refunds for returned purchases or pending reimbursements.

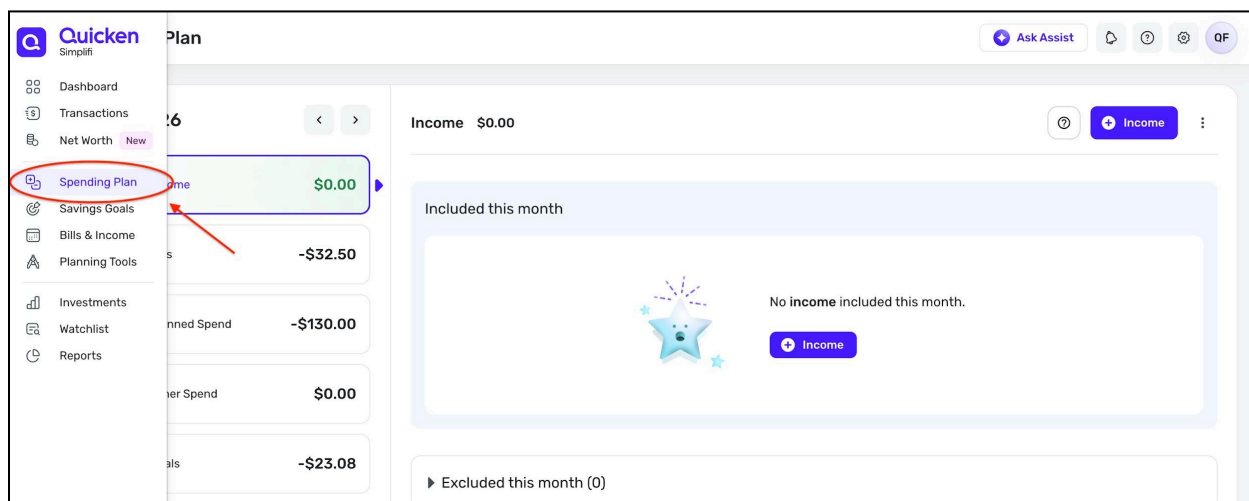

1. Select the **Refunds** tab.

2. Click **Track a Refund**.
  - If you already have refunds listed, click **+ Refund** in the upper-right corner.
3. Enter the refund details, including the payee, amount, expected date, and account.
4. (Optional) Add a category, notes, or attachments.
5. Click **Submit**.

# Budget With a Spending Plan

The **Spending Plan** in Quicken Simplifi helps you organize your monthly budget and monitor your spending throughout the month.

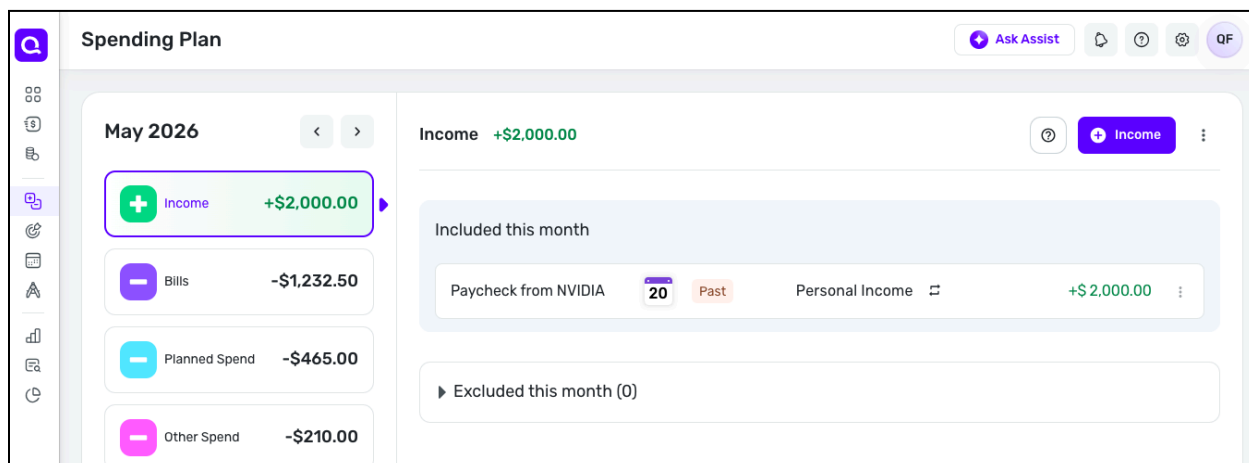

It is divided into six sections: **Income**, **Bills**, **Planned Spend**, **Other Spend**, **Goals**, and **Left This Month**.

## Income

The **Income** section includes recurring income series, such as paychecks or regular deposits. Any recurring income listed in the **Bills & Income** section will automatically appear here.

1. In **Spending Plan**, review the income items listed in the **Income** section.

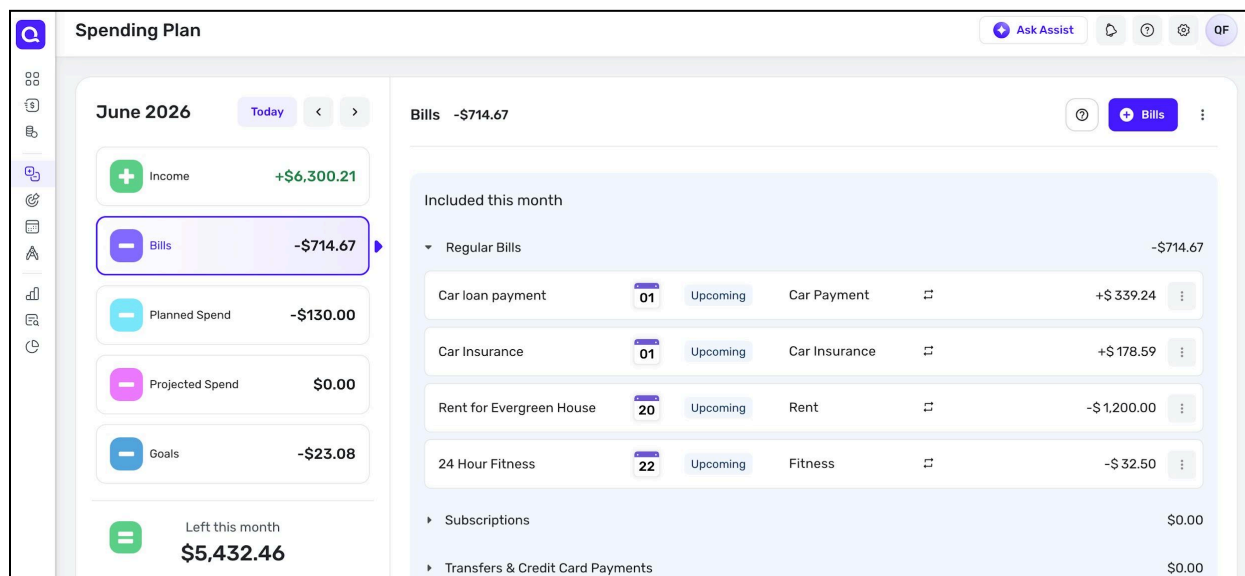

2. If income is missing, click **+ Income**.
3. Select a transaction and click **Create** to make a recurring income series.
4. Click **Edit Series** in the pop-up window.
5. Review the series details, then click **Update**.

You can also create recurring income series from the **Bills & Income** section or directly from **Transactions** by selecting a transaction and using the **three-dot menu**.

## Bills

The **Bills** section includes recurring expenses such as rent, utilities, subscriptions, and other scheduled payments. These are pulled from your existing recurring transactions and shown for the month you are currently viewing.

1. In **Spending Plan**, review the items listed in the **Bills** section.

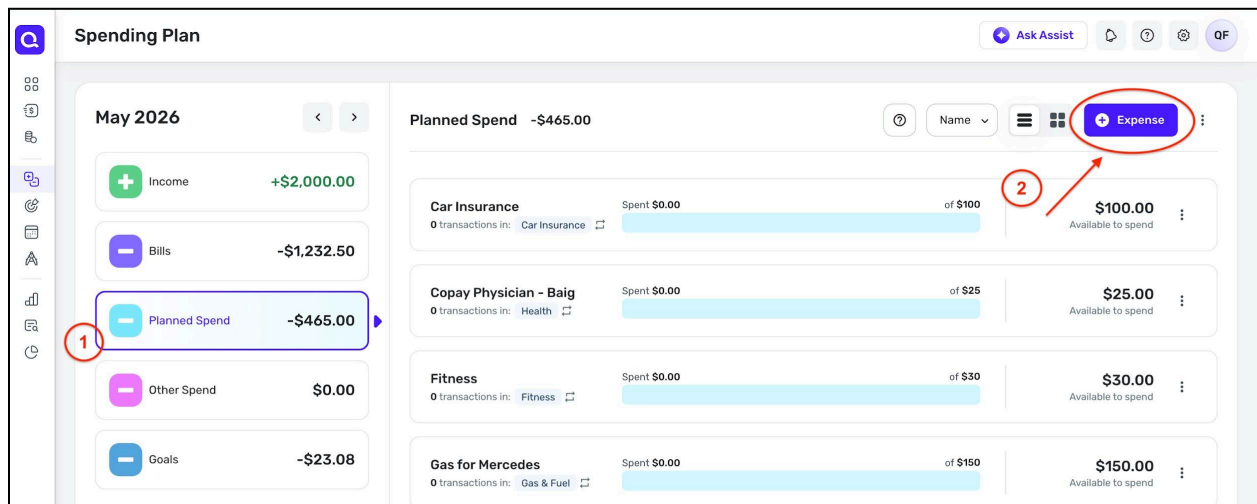

2. If a bill is missing, click **+ Bills**.
3. Select a transaction, then click **Create** to make a recurring bill series.
4. Click **Edit Series** in the pop-up window.
5. Review the series details, then click **Update**.

This section gives you a clear view of your expected fixed monthly expenses. As with income, recurring bills can also be created in both the **Bills & Income** section and the **Transactions** view.

## Planned Spend

The **Planned Spend** section is used to set monthly budgets for variable or one-time expenses, such as groceries, gas, dining out, or other flexible spending categories. Unlike income and bills, these items are not automatically created from recurring transactions – you choose which categories to include and how much to allocate.

1. In **Spending Plan**, go to the **Planned Spend** section.
2. Click **+ Expense** to add a budget item.

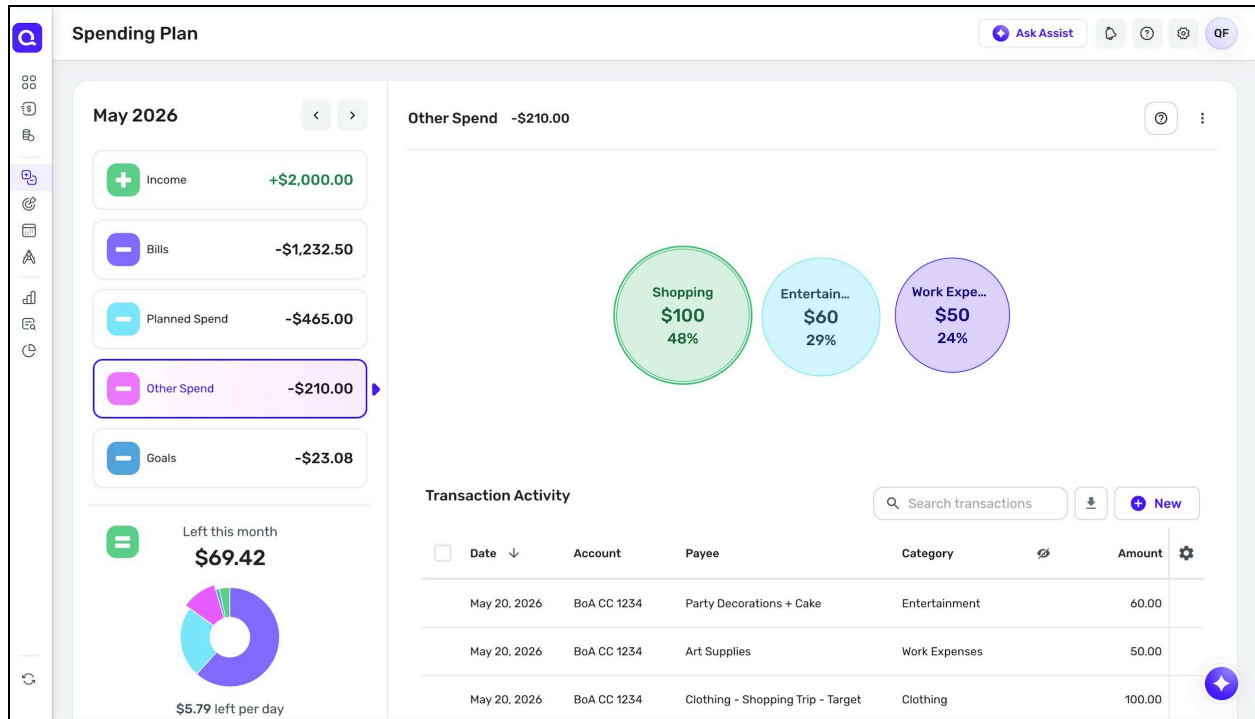

3. Select a spending category (e.g., Groceries or Restaurants).
4. Enter a target amount for your monthly budget.
5. If you'd like the budget item to repeat month to month, select **Recurring Expense**.
6. Click **Create**.

Once added, Simplifi tracks your actual spending in that category throughout the month so you can see how it compares to your planned amount.

## Other Spend

The **Other Spend** section shows your remaining month-to-date spending that is not included elsewhere. It is automatically generated from your connected account transactions.

1. In **Spending Plan**, go to the **Other Spend** section.
2. Review your spending, which is grouped into category bubbles.

3. Click any category bubble to expand it and view the individual transactions inside it.
4. From the transaction view, you can open a transaction to review or edit its details.
5. Drag category bubbles to rearrange how they are displayed.

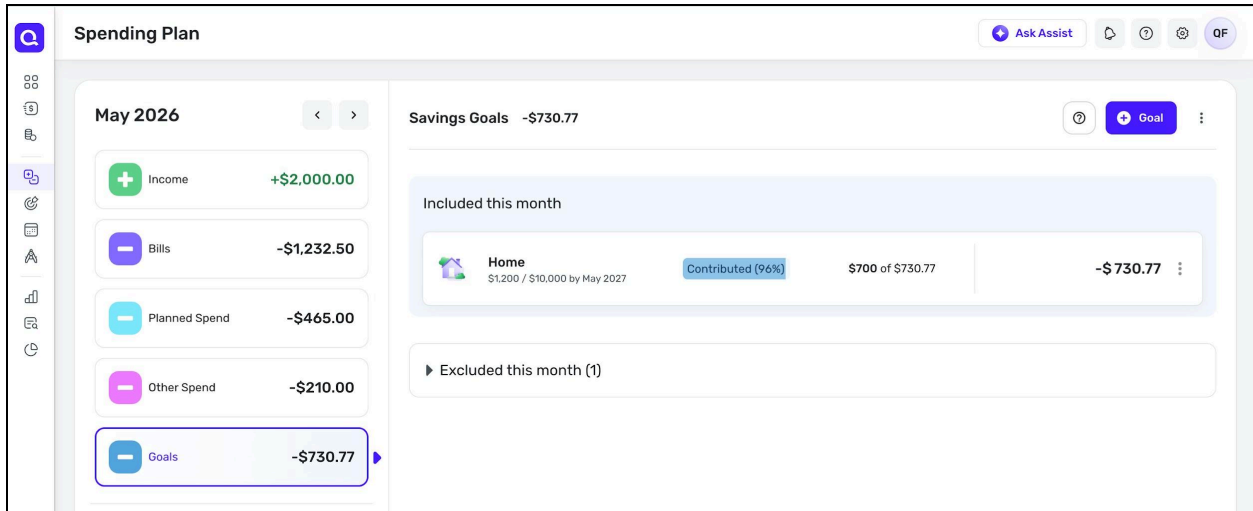

This section helps you see where your remaining day-to-day spending goes each month.

## Goals

The **Goals** section shows your Savings Goals and how they affect your monthly budget. If a goal is included in your Spending Plan, its monthly contribution is counted as part of your planned spending.

You can view all of your existing Savings Goals and see how each one contributes to your monthly budget.

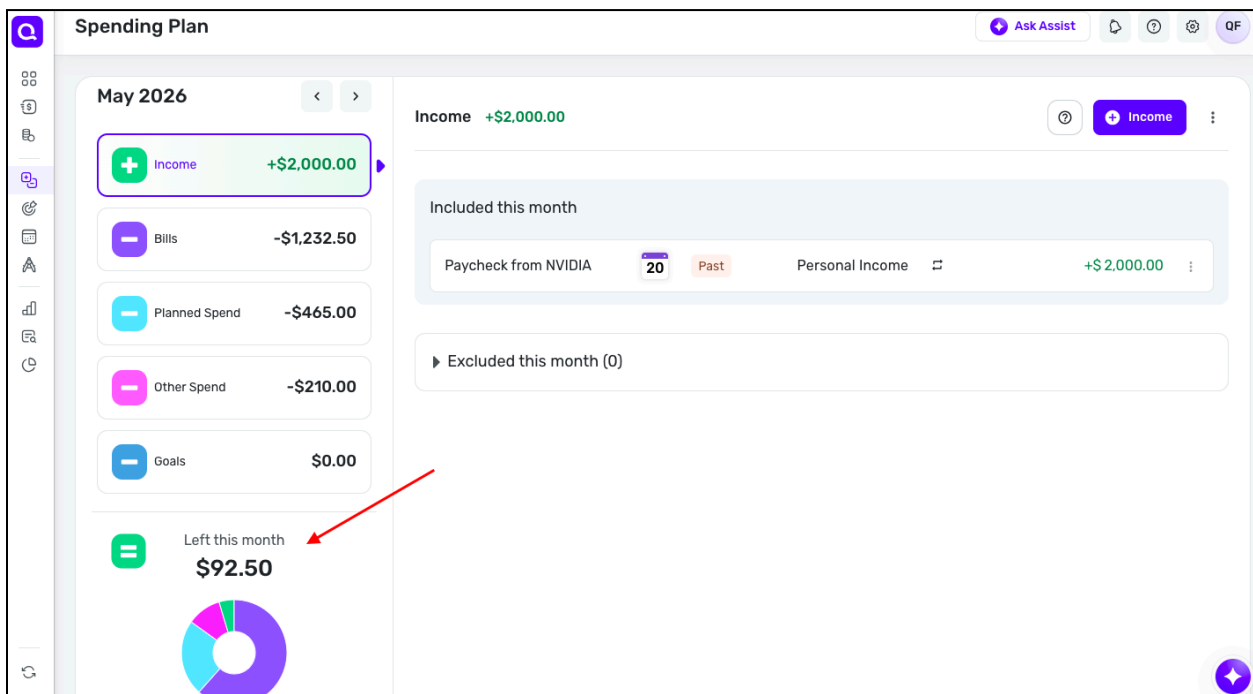

1. In **Spending Plan**, go to the **Goals** section.

2. Review your listed Savings Goals and their monthly contribution amounts.
3. Open a goal to see or adjust its details.
4. To create a new goal, click **+ Goal** and you will be taken through the same setup process as in the **Savings Goals** section (see next page).

## Left This Month

The **Left This Month** feature shows how much money you still have available to spend during the current month. It is calculated using the income, bills, planned spend, other spend, and savings goals included in your Spending Plan.

As your Spending Plan changes throughout the month, the Left This Month amount updates automatically.

1. In **Spending Plan**, locate **Left This Month** (this is not a section you can navigate to or expand, just an updating image at the bottom of the Spending Plan sidebar).
2. Review the remaining amount available for the month.
3. Use this amount to help pace your spending for the rest of the month.

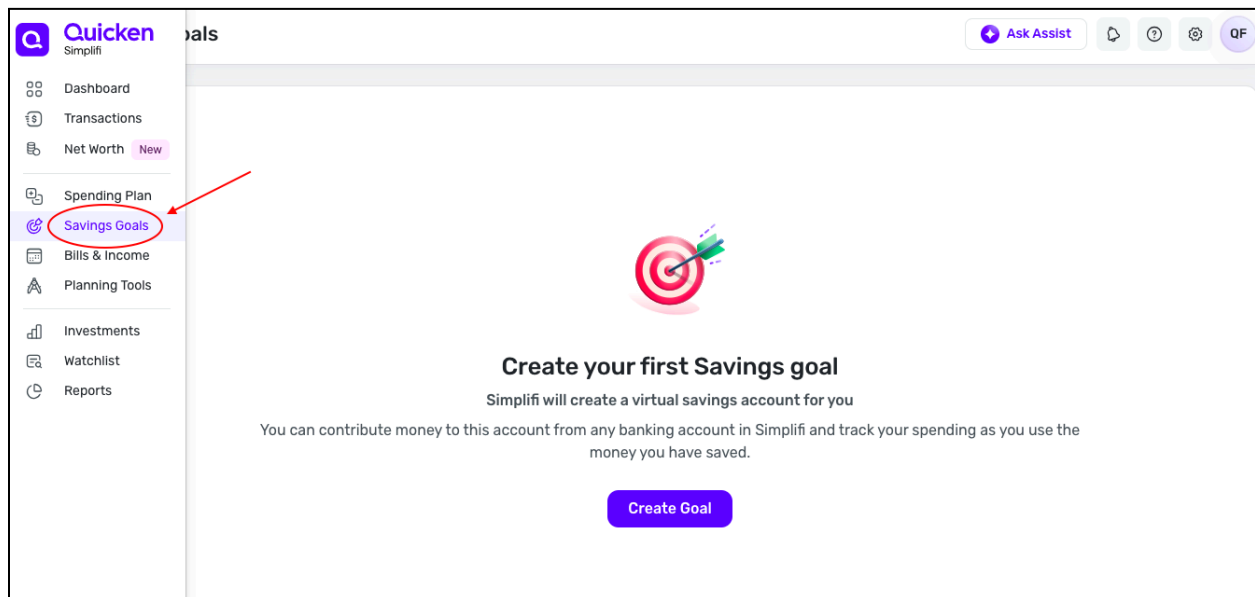

The Left This Month total is based on your monthly plan and spending activity, not your current bank account balance.

## Set Savings Goals

The **Savings Goals** feature in Quicken Simplifi helps you save for future expenses such as vacations, large purchases, or emergency funds. You can track your progress, contribute money over time, and include goal contributions in your Spending Plan.

### Create a Goal

1. From the left menu, select **Savings Goals**.

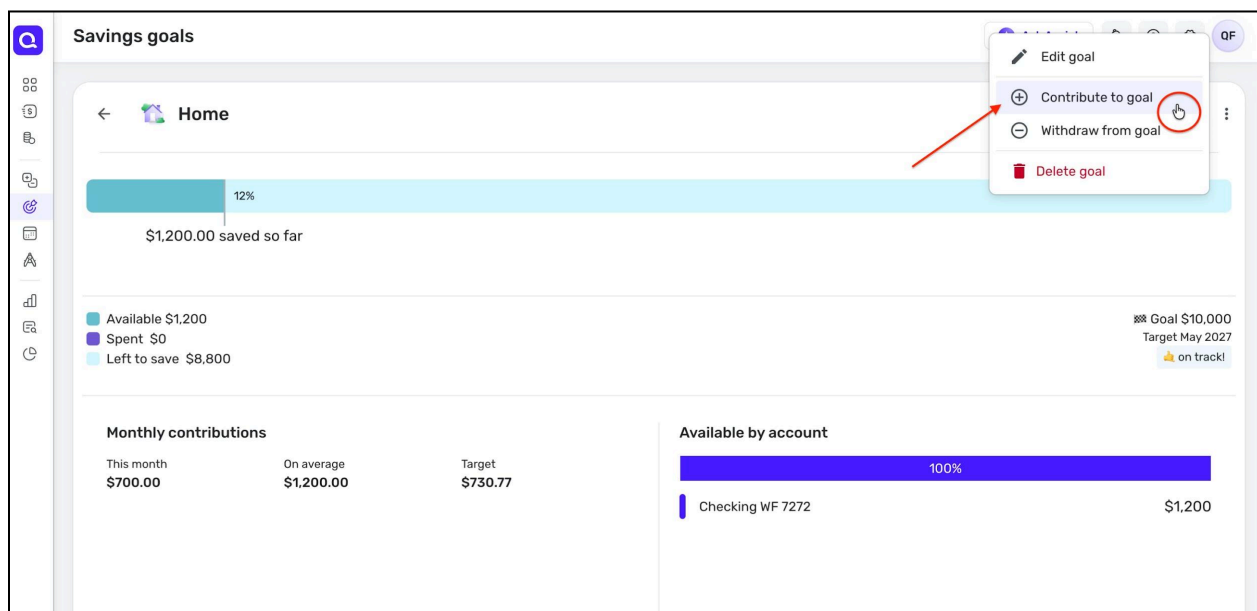

2. Click **Create Goal**.
  - If you already have a goal, click **+ Goal** in the upper-right corner.

3. Select the type of goal you want to create.
4. Enter a goal name and target amount.
5. (Optional) Enter any amount already saved and select the account where those funds are stored.
6. Click **Continue**.
7. Set a target date, or select **Don't Set** if you do not want to use one.
8. Click **Continue**.
9. Review the goal details and choose whether to include the goal in your Spending Plan.
10. Click **Create Goal**.

When creating a Savings Goal, you can choose whether its monthly contribution should be included in your Spending Plan. You can also change this setting later, either by editing a goal in the **Savings Goals** section or in the **Goals** section within the Spending Plan.

## Add a Contribution

1. Open **Savings Goals**.
2. Locate the goal and click the **three-dot menu**.
3. Select **Contribute to goal**.

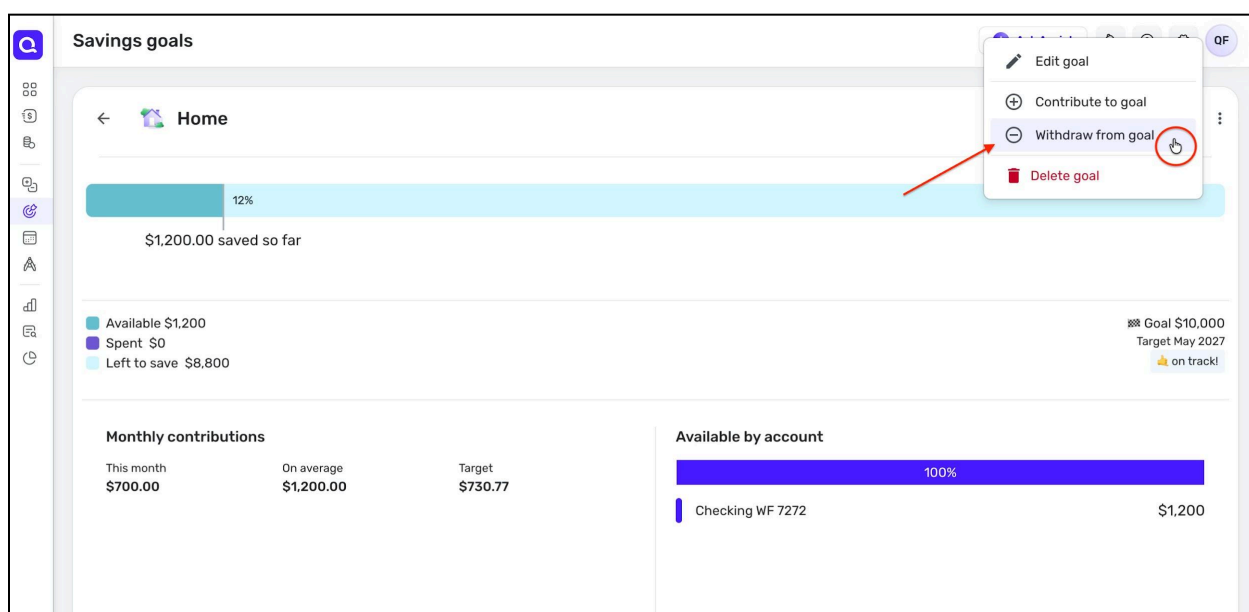

4. Enter the contribution amount.
5. Select the account to contribute from.
6. Click **Contribute**.

**Note:** Contributions can only be made from banking accounts such as checking or savings accounts. Quicken Simplifi will only create a record of a contribution and will never add to or withdraw money from your actual financial accounts.

## Withdraw Money From a Goal

1. Open **Savings Goals**.
2. Locate the goal and click the **three-dot menu**.
3. Select **Withdraw from goal**.

4. Choose one of the following options:
  - **Spend a custom amount** to use saved money toward the goal itself.
  - **Withdraw for something else** to return funds to your general spending money.
5. Enter the withdrawal amount.
6. Click **Withdraw**.

**You can now begin using Quicken Simplifi to track your income, spending, and savings goals!**
